

CLARK - COOPER DIV.
MAGNATROL VALVE CORPORATION
STANDARD & HIGH PRESSURE SOLENOID VALVES

ROTARY SHAFT STYLE SOLENOID VALVES

**Available For
Quick Delivery**

Controls The Flow Of:

- **Extremely Corrosive Fluids**
- **Dirty Or Viscous Liquids**
- **Cryogenics**
- **High Temperature Liquids & Gases**

COMPANY OVERVIEW

The **Clark-Cooper Division** of Magnatrol Valve Corporation offers a complete line of industrial solenoid valves for process control.

- Established 1962
- Experienced Applications / Engineering Staff for Customer Assistance
- Certified ISO 9001:2000 Quality Management System
- Quick Delivery

*EH50 Series, 1/2" - Full Port
10,000 PSIG Operating Pressure*

*ER Series Emergency Shut-Off Valve
Electrically Trips Closed,
Manually Reset Open*

OUR PRODUCTS & SERVICES

High Pressure Solenoid Valves (Catalog EH)

- 1/4" to 2" Pipe Size
- Pressures up to 10,000 PSIG
- NEMA 4X and Explosion-Proof Solenoid Enclosure

Rotary Shaft Style Solenoid Valves (Catalog ER)

- 1/2" to 6" Pipe Size
- All solenoid components are isolated from the process fluid
- NEMA 4X and Explosion-Proof Solenoid Enclosure
- Emergency Shut-Off (or Deluge) Valves
- 3-Way Valves

Engineered Valve Modifications and **New Designs** to meet specific application requirements

Designs for Navy and Marine Service, Qualified for Shock and Vibration (MIL-S-901 and MIL-STD-167-1)

Large library of custom valve designs

General Purpose Industrial Solenoid Valves are available direct from Magnatrol Valve Corporation.

- 1/4" to 3" Pipe Size
- Bronze and Stainless Steel
- Watertight and Explosion-Proof Solenoid Enclosure
- Pressures up to 500 PSIG
- Temperatures up to 400°F
- Quick Delivery

Request Catalog 3006

ROTARY SHAFT STYLE SOLENOID VALVE CONSTRUCTION FEATURES

BASIC OPERATION:

When the Solenoid is energized, the Plunger pulls the External Lever upwards. The lever rotates the Rotary Shaft, which penetrates the valve's pressure boundary, to open or close the Piston Assembly.

The **Solenoid** is completely isolated from the process fluid allowing the valve to easily handle extremely corrosive and/or high temperature fluids.

- **Continuous Duty, Encapsulated Coil with Class H Insulation**
- **NEMA 4X - Watertight and Corrosion Resistant Enclosure**
- **Certified Explosion-proof Enclosure for Hazardous Atmospheres**

The **Plunger** is Teflon® coated to provide superior corrosion resistance.

The **External Lever** provides visual position indication and manual override.

ROTARY SHAFT ASSEMBLY: The Rotary Shaft Assembly has a primary o-ring seal and a secondary, spring-loaded packing seal, providing zero leakage to the environment.

The rotary shaft rotates approximately 20° to 30° to open and close the Piston Assembly inside the valve, virtually eliminating seal wear.

PISTON ASSEMBLY: The Piston Assembly is directly connected to the Rotary Shaft Assembly allowing all valves to operate from 0 PSI up to the valve's rated pressure.

The **Direct Operated Piston Assembly** uses a solid piston with large clearance areas to easily accommodate dirty or viscous liquids.

The **Direct Operated, Pilot Assisted Piston Assembly** (shown here) uses an internal pilot orifice that assists the piston by relieving the pressure above it, thus accommodating higher pressures and/or larger pipe sizes.

CONSTRUCTION MATERIALS AVAILABLE FOR ALL WETTED COMPONENTS

Valve Body / Bonnet

- Commercial Bronze
- Naval Bronze
- 304 Stainless Steel
- 316 Stainless Steel
- Hastelloy® C
- Monel®
- Alloy 20

Piston & Rotary Shaft Assemblies

- 300 Series SS
- 316 Stainless Steel
- Hastelloy® C
- Monel®
- Alloy 20

Valve Disc/Seals

- Teflon®
- GF Teflon®
- Buna-N
- Viton®
- EPDM
- Silicone

SOLENOID: Explosion-proof approved for Hazardous Atmospheres. Contact the factory for listing details.

END CONNECTION: NPT, 150# ANSI Flange, 300# ANSI Flange, Socket Weld, Union, many other choices available.

VOLTAGES: See Page 5.

OPTIONS: Position Indicating Switches, Manual Override with Lock Pin, Electrical Terminal Box and others. See Page 7.

2-WAY VALVE DESIGN

APPLICATION:

Clark-Cooper's Rotary Shaft Style Solenoid Valves are used to control the flow of **Extremely Corrosive Fluids • Dirty Fluids • Viscous Fluids • Cryogenics • Fuel Oils • Flammable Liquids and Gases • Steam • High Temperature Liquids and Gases • Heat Transfer Liquids**. The valves are used for applications where it is desirable to have the solenoid and all its magnetic components isolated from the process fluid.

FULLY ELECTRIC

Valve Shown is a 4" - Full Port, 316 Stainless Steel, 150# ANSI Flanged, Fully Electric Valve.
Type: Normally Closed, Energize to Open
Options:

- (2) SPDT Position Indicating Switches
- Terminal Box mounted on back of bracket

FULLY ELECTRIC VALVE controls process liquids and gases without ancillary pneumatic or hydraulic systems.

- **NORMALLY CLOSED, ENERGIZE TO OPEN:** Valve opens when energized and closes when de-energized.
- OR**
- **NORMALLY OPEN, ENERGIZE TO CLOSE:** Valve closes when energized and opens when de-energized.

EMERGENCY TRIP VALVES

MANUALLY RESET, EMERGENCY SHUT OFF VALVE immediately stops the flow of fluid when an emergency or shutdown condition exists.

- **ELECTRICALLY TRIPPED CLOSED:** Valve immediately closes upon electrical signal. **MANUALLY RESET OPEN.**
- OR**
- **TRIPS CLOSED ON LOSS OF POWER:** Valve immediately closes on loss of power. **MANUALLY RESET OPEN.**
- OR**
- **HEAT ACTUATED CLOSED:** Valve immediately closes at 135°F, 165°F, 212°F, 286°F or 386°F. **MANUALLY RESET OPEN.**

When the emergency condition has passed, the valve **MUST BE** manually reset to the open position.

Emergency Shut-off Valve:
Electrically Tripped Closed,
Manually Reset Open
(Shown Latched Open)

MANUALLY RESET, EMERGENCY DISCHARGE VALVE immediately releases fluid when an emergency condition exists. Used for emergency dump, deluge or purge systems.

- **ELECTRICALLY TRIPPED OPEN:** Valve immediately opens upon electrical signal. **MANUALLY RESET CLOSED.**
- OR**
- **TRIPS OPEN ON LOSS OF POWER:** Valve immediately opens on loss of power. **MANUALLY RESET CLOSED.**
- OR**
- **HEAT ACTUATED OPEN:** Valve immediately opens at 135°F, 165°F, 212°F, 286°F or 386°F. **MANUALLY RESET CLOSED.**

When the emergency condition has passed, the valve **MUST BE** manually reset to the closed position.

Emergency Discharge Valve: Electrically Tripped Open, Manually Reset Closed (Shown Tripped Open)

2-WAY VALVES 1/2" TO 6" PIPE SIZE • FULL PORT

2-Way Valve Characteristics

NO DIFFERENTIAL PRESSURE REQUIRED TO OPEN
All valves operate from zero to maximum pressure listed in table.

Pipe Size (inches)	C _v	Solenoid Series	MOPD* (PSIG)				Shipping Wt. (lbs.) (for NPT)	Dimensions (inches)					
			Direct Operated		Pilot Assisted			A NPT	A 150# Flange	A 300# Flange	B	C	D

6	468	800	NA	NA	75	60	275	NA	16.0	NA	24.0	22.0	11.5

*MOPD = Maximum Operating Pressure Differential
NOTE: Use higher (800 Series) MOPD for all Trip Valves.

Weights and dimensions are approximate.
Maximum Fluid Temperature 550°F

Available Construction Materials are listed on Page 3.

Solenoid Characteristics

Solenoid Coil: Class H, Continuous Duty
18" long, 18 gage wire leads

Solenoid Enclosure: NEMA 4X, Watertight and Corrosion Resistant and NEMA 7, Explosion-proof, Class I, Groups B, C and D, Division 1

Conduit Connection: 1/2" NPT

AC voltages suitable with 50 and 60 Hertz

Solenoid Series	Voltage	Amps Inrush †	Amps Holding
400	24V AC/DC	18.0	1.0
	48V DC	12.0	0.6
	120V AC/DC	5.0	0.3
	240V AC/DC	4.0	0.1
800	24V AC/DC	27.0	2.0
	48V DC	25.0	1.0
	120V AC/DC	16.0	0.5
	240V AC/DC	8.0	0.2

† Amps inrush duration of approximately 1 second.

NOTE: Trip valves use the 400 Series solenoid.

ETL LISTED

Conforms to
UL Std. 1203
Certified to CAN/CSA Std.
C22.2 No.30

Consult Factory for
Listing Details.

3-WAY DIVERTING VALVES 1/2" TO 2" PIPE SIZE • FULL PORT

APPLICATION:

Clark-Cooper's Rotary Shaft Style, 3-Way Diverting Solenoid Valves are used to control the flow of **Extremely Corrosive Fluids • Dirty Fluids • Viscous Fluids • Cryogenics • Fuel Oils • Flammable Liquids and Gases • Steam • High Temperature Liquids and Gases • Heat Transfer Liquids**. The valves are used for applications where it is desirable to divert the process fluid to another location, such as a recirculation tank.

Fully Electric Valve

FULLY ELECTRIC DIVERTING VALVE diverts the process fluid when energized, returns to normal flow direction when de-energized.

Emergency Trip Valves

MANUALLY RESET, EMERGENCY DIVERTING VALVE immediately diverts flow when an emergency condition exists.

- **ELECTRICALLY TRIPPED:** Valve immediately diverts flow upon electrical signal. **MANUALLY RESET.**

OR

- **TRIPS ON LOSS OF POWER:** Valve immediately diverts flow upon loss of power. **MANUALLY RESET.**

OR

- **HEAT ACTUATED TRIP:** Valve immediately diverts flow at 135°F, 165°F, 212°F, 286°F or 386°F. **MANUALLY RESET OPEN.**

When the emergency condition has passed, the valve **MUST BE** manually reset.

Emergency Diverting Valve, Trips on Loss of Power
Options:

- 316 SS Union End Connections
- (2) SPDT Position Indicating Switches
- Manual Override with Lock Pin (Shown in Tripped Position)

NO DIFFERENTIAL PRESSURE REQUIRED

All valves operate from zero to maximum pressure listed in table.

3-Way Valve Characteristics

Pipe Size (inches)	C _v	Solenoid Series	MOPD* (PSIG)	Shipping Wt. (lbs.) (for NPT)	Dimensions (inches)					
					A NPT	A 150# FL	A 300# FL	B	C	D
1/2	4.5	400	200	20	3.3	4.3	5.5	12.5	7.0	5.0
		800	720	25				14.5		
3/4	7.8	400	50	22	3.5	7.0	7.6	12.8	8.5	5.5
		800	350	27				14.8		
1	10.5	400	25	29	4.2	7.3	7.8	13.0	9.2	5.5
		800	150	38				15.0		
1-1/2	42.8	800	35	52	4.9	6.5	7.5	17.5	12.0	7.0
2	62.5	800	15	75	6.0	8.0	9.0	18.0	14.0	8.0

*MOPD = Maximum Operating Pressure Differential
NOTE: Use higher (800 Series) MOPD for all Trip Valves.

Weights and dimensions are approximate.
Maximum Fluid Temperature 550°F

3-Way Diverting Valve

For Solenoid Characteristics see Page 5.

NOTE: Valve configurations vary depending on Pipe Size, End Connection, Material Selection and other factors. Consult the factory for details.

Photo at the top of the page shows a single valve body with a tailpiece configuration.

Diagram to the left shows a configuration using (2) 2-way valve bodies with one end capped.

Both configurations operate in a similar manner.

Available Construction Materials are listed on Page 3.

OPTIONS and ACCESSORIES

Position Indicating Switches

- 1 or 2 switches can be mounted to the bracket
- Mechanically Actuated
- Heavy Duty SPDT or DPDT
- Watertight and/or Explosion-Proof Enclosures (see **Figure 1**)

Terminal Block available:

- Mounted in a separate enclosure for easier electrical connections.
- Mounted on the back of the bracket (see **Figure 1**) or other suitable location.

Manual Override with Lock Pin allows the valve to be operated manually and locked in place. A knob is added to the lever for easier operation. (see **Figure 2**)

Dashpot for slow closing to reduce water hammer effect.

Shock and Vibration construction for qualification in accordance with Military Specifications MIL-S-901 and MIL-STD-167-1.

3-Way Valve Flow Options

- Supply Normally Closed (Vent Open)
- Supply Normally Open (Vent Closed)
- Diverting: (1) Inlet, (2) Outlets
- Selecting: (2) Inlets, (1) Outlet
- Universal

Figure 2

Clark-Cooper maintains a large library of valve designs and design modifications to accommodate many unique applications.

Please contact us if you require a special end connection, material selection or other option not listed in this catalog.

Our Engineering Department routinely incorporates customer specified options and accessories into existing valve designs. When necessary, new designs are created to meet the customer's special requirements and specifications.

We invite you to challenge us with your special application requirements.

REQUEST FOR QUOTE

We appreciate the opportunity to quote on your requirements.

For immediate quote: Fill in the information below and CALL 856-829-4580

For same day quote: Fill in the information below and FAX to 856-829-7303

For next day quote: Email your requirements to techsupport@clarkcooper.com or use the Request For Quote form on our website www.clarkcooper.com
